FILE COPY

Dear Honorable Members of the Board of Directors,

The Hart Pond Association is writing to express concern over T-Mobile's request to place a cell tower on the Middlesex County 4H Fair property located at 55 South Chelmsford Road in Westford, MA – immediately adjacent to Hart Pond. A cell tower would be incompatible with the rural landscape and scenic views of Hart Pond. It would be visible from nearly every property on the pond including the public beach on Pond Street in Chelmsford, in stark contrast to the natural skyline of Hart Pond. Consequently, residents have serious concerns about the effects of a cell tower on property values and the domino impact on neighboring houses. Those with a direct view of the tower from their property fear added difficulty in efforts to sell their homes. They are also concerned about health risks. The safety of cell towers is a widely debated controversy; there is no scientific evidence to support the claims that they are just harmless intruders in neighborhoods. Warning signs on other T-Mobile area compounds indicate that there is a danger and recent studies show possible

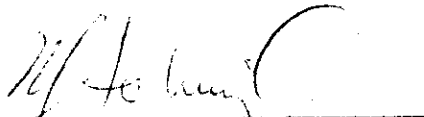

relationships to health risks with links to cancer. In addition, the cell phone tower will be located in the Hart Pond Watershed and may have an adverse affect on wildlife and the water flowing to the pond.

We recognize that T-Mobile is making an effort to improve their service for the residents and business owners of Westford and Chelmsford. Clearly, enhanced cell phone reception and internet service is desirable by anyone with a cell phone or a computer. However, it is our belief that this can be achieved without placing the tower in this idyllic setting.

It is also our understanding that T-Mobile is considering 5 Lyberty Way in Westford as an alternative location for the cell tower. This location, being more commercial in nature, seems more appropriate. The Middlesex County 4H Fairground is a place people go to escape the clutter of urban life and enjoy an agricultural fair or a horse show. Clearly, a cell tower has no place in the middle of such a vista.

Therefore, the Hart Pond Association requests that the Middlesex County 4H Fair Board rejects T-Mobile's appeal to locate a cell tower on the 4H property. The 4H Fair is an asset to this community — a cell tower that is an eyesore on the fairgrounds adversely impacts the neighborhood and carries no credible long term value.

Sincerely,

Mark Schmeizl
President, Hart Pond Association
860-378-7147 (cell)

Norman Rivard
Vice President, Hart Pond Association

Pam Rivard
Treasurer, Hart Pond Association

Jon Madsen
Secretary, Hart Pond Association
